SLAC's First Web Pages

Mouse over any of the page images below to see the original underlying html code.

DEFAULT.HTML page

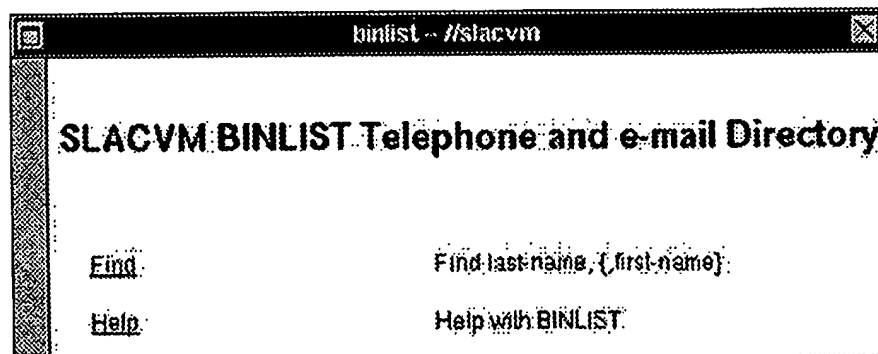

SLAC VM was the mainframe computing system at SLAC in 1991.

BINLIST was the online directory of staff, faculty, and high-energy physics correspondents' names and contact information.

BINLIST.HTML page

Clicking on the "BINLIST" link on the DEFAULT.HTML page (above) opened this page.

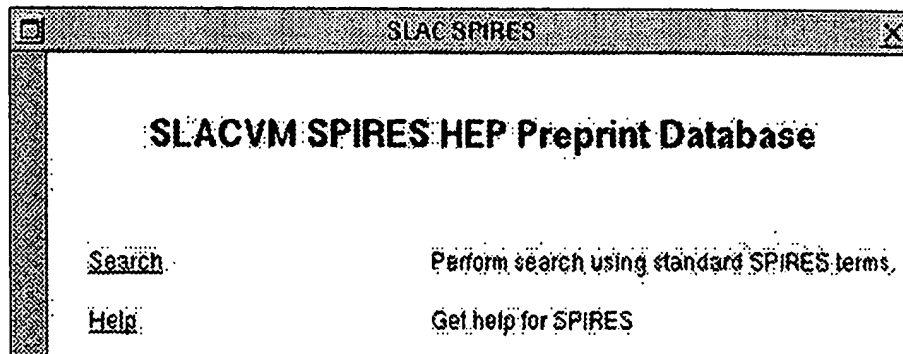

SPIRES.HTML page

Tim Berners-Lee, who invented the World-Wide Web, has called the SLAC web interface to SPIRES-HEP the "killer app" that showed the world what the web could do.

In December 1991, SPIRES-HEP was already a very popular database among high energy physicists. They were thrilled with the improved and instantaneous access to SPIRES-HEP provided by SLAC's new web interface. Clicking "Search" on this page linked a user to SPIRES.INDEX, and clicking "Help" took them to a page named SPIHELP.INDEX.

(Visit the [current SPIRES-HEP](#) web interface.)

SPIRES.INDEX page

Clicking on the "Search" link on the SPIRES.HTML page (shown above) activated this search interface page.

You can search this index. Type the keyword(s) you want to search for:

SLAC SPIRES HEP Preprint database search

Use standard SPIRES search terms such as...

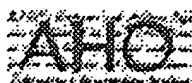

find author Perl, M
find title tau and date 1980

BINLIST.INDEX page

Clicking on the "Find" link on the BINLIST.HTML page opened this search interface page.

You can search this index. Type the keyword(s) you want to search for:

SLAC Phone and E-mail directory search. Supply Last-name or Last-name, First-name

Questions? slacarc@slac.stanford.edu
